

IMPORTANT

CLEANING & MAINTENANCE OF COMPACT LAMINATE

Compact laminate is engineered to last for many years. We provide a 10 year guarantee on panel integrity.

The non-porous surface is easy to clean. The decorative surface and resin core of Compact Laminate is impervious and resistant to most commonly used cleaning agents and disinfectants.

Recommended cleaning agents

Surfaces can be easily cleaned with a dry or damp cloth and if necessary a mild household cleaner.

- **General cleaning:** All-purpose cleaner (e.g. Ajax Spray & Wipe), household cleaners, water or soap are recommended.

It is resistant to everyday wear and tear but needs some attention for harsh conditions and staining.

- **Spray paint:** Turpentine or SPC 801
- **Permanent marker:** Methylated spirits or SPC 801

Never use any of the following on Compact Laminate:

- Do not use abrasive or polishing materials. Abrasive cleaners such as Jif Cream Cleanser, Ajax (powder or liquid), Chemco, Brasso, Mr. Muscle oven cleaner or Scrub free.
- Scourer pads, Wire wool or Sandpaper.
- High pressure water cleaning or steam cleaning of panels is not recommended.
- Neat Janola or other equivalent brands of bleaches.
- Any product containing strong mineral acid such as sulphuric acid, Battery acid, hydrochloric acid, nitric acid or phosphoric acid. Commercial toilet cleaners, grout removers, descalants, rust removers, etc.
- Care must be taken where cleaning agents or solvents are highly acidic or alkaline as these may permanently damage the surface.

Other Tips:

- The use of CRC or equivalent on hinges and indicator bolts is recommended at least once every 3 months (sooner for challenging environments).
- An occasional re-finish of the exposed edges with an “off the shelf” wood-polish will rejuvenate the original polished seen edges.
- Any chemicals should be washed off so that they don't keep working on the panels.
